RCG IT Explains Enterprise Information Management at DAMA Wilshire Conference

Edison, NJ, March 17, 2008 – RCG Information Technology (www.rcgit.com) is participating in the DAMA Wilshire Meta-Data Conference taking place in San Diego, CA on March 16 through March 20. Robert Abate, Global Managing Principal for the Development & Integration practice, will be speaking on behalf of RCG IT on Enterprise Information Management (EIM). The conference is known for being the foremost data management educational events in the world including one thousand business and IT solution experts.

Robert Abate, RCG IT's Global Managing Principal for the Development & Integration practice, will discuss how Enterprise Information Management (EIM) correlates with an understanding of business architecture. The first area discussed will be about End-To-End Data Management. Robert Abate explains, "This area is important to the information foundational components, how to build an EIM, as well as maintaining flexible architectures."

Recognized as one of the first to publish on Service Oriented Architectures, Robert Abate is a member of the faculty of The Data Warehousing Institute and DAMA. He will articulate the EIM plan and convey the understanding of business architecture revealing proven techniques for success.

The Enterprise Information Management sector that is being covered by RCG IT will touch on areas of end-to-end data management components, data quality and governance, data and delivery architectures, performance management, and analytics management.

The conference will be comprised of over 200 hours of in-depth tutorials, hands-on workshops, presentations and case studies from leading data management practitioners. Service oriented architecture, enterprise information management, and master data management are only three of the fourteen educational tracks featured. The event aims to give professionals the opportunity to connect
